University of New Mexico Health Sciences Center– Epidemiology, Biostatistics, and Preventive Medicine

Job Title: **Biostatistician**

The University of New Mexico, Health Sciences Center, Department of Internal Medicine, seeks a faculty member to join the Division of Epidemiology, Biostatistics, and Preventive Medicine. This position is at the rank of Assistant or Associate Professor and on the Tenure track. Salary and rank will be commensurate with experience and education.

**Company Information:**
The UNM Health Sciences Center, Division of Epidemiology, Biostatistics and Preventive Medicine (EBPM) is in the Department of Internal Medicine. It consists of 23 Research and Tenure Track faculty, and approximately 15 staff scientists, post-doctoral fellows, and students, along with a number of esteemed researchers who hold adjunct volunteer positions. The Preventive Medicine Residence Program is part of the Division, and includes 3 full time faculty, and currently 4 residents. The Division has over $5M in research funding and maintains close ties to many UNM Health Sciences Center departments, centers, and colleges where individual EBPM faculty are frequent and essential collaborators.

**Responsibilities and Position Qualifications:**
The successful candidate will develop and maintain his/her own research program with a focus epidemiology, population health, health disparities, in chronic or infectious disease, or biostatistics. Biostatisticians with expertise in research design, epidemiology, biostatistical analyses of clinical trials, and prospective observational and implementation research are encouraged to apply. This individual will also support teaching in undergraduate medical education, and other graduate level programs in health and population science. The candidate will also be expected to join and develop collaborations within the UNM HSC with clinicians and researchers to advance public health, and clinical and translational research.

**Minimum Requirements:**
1) PhD or equivalent degree in Statistics, Biostatistics or a related field; 2) Must have at least 3-years of experience in Biostatistics research in biomedical setting; and 3) Candidate must be eligible to work in the US.

**Preferred Qualifications:**
1) Interest and experience in Applied Statistics, Biometrics/biostatistics, Mathematical statistics; 2) Evidence of successfully working in a team science framework with health science investigators, as demonstrated by publications and successful grant funding; 3) Experience leading data coordinating and biostatistical activities for multi-site trials, including developing protocols, writing statistical analysis plans, and supervising analysts and junior statisticians; 4) Evidence of experience teaching and/or mentoring in biostatistics; 5) A demonstrated commitment to
diversity, equity, inclusion, and student success, as well as working with broadly diverse communities.

This position may be subject to a criminal records screening in accordance with New Mexico law.

For best consideration apply by 8/27/2021; however, the position is open until filled.
