As a UW employee, you have a unique opportunity to change lives on our campuses, in our state and around the world. UW employees offer their boundless energy, creative problem solving skills and dedication to build stronger minds and a healthier world.

UW faculty and staff also enjoy outstanding benefits, professional growth opportunities and unique resources in an environment noted for diversity, intellectual excitement, artistic pursuits and natural beauty.

The Institute for Health Metrics and Evaluation (IHME) is an independent research center at the University of Washington. Its mission is to deliver to the world timely, relevant, and scientifically valid evidence to improve health policy and practice. IHME carries out its mission through a range of projects within different research areas including the Global Burden of Diseases, Injuries, and Risk Factors; Future Health Scenarios; Costs and Cost Effectiveness; Resource Tracking; and Impact Evaluations. Our vision is to provide policymakers, donors, and researchers with the highest-quality quantitative evidence base so all people live long lives in full health.

IHME is committed to providing the evidence base necessary to help solve the world's most important health problems. This requires creativity and innovation, which are cultivated by an inclusive, diverse, and equitable environment that respects and appreciates differences, embraces collaboration, and invites the voices of all IHME team members.

**IHME has an excellent opportunity for a Researcher to join our Resource Tracking Economic Indicators team.** We are looking for someone who will help drive forward our research, which focuses on estimating and forecasting health spending and gross domestic product for 204 countries and nearly 300 subnational geographies. This work is fast-paced and highly quantitative. Across IHME, researchers analyze and produce key estimates for their assigned research team. This work will focus on using data from household and administrative surveys, economic databases, published literature, and internal team outputs. Using established modeling tools and through creation of novel code, researchers incorporate all relevant data to
produce the most up-to-date and scientifically credible results. Researchers are integrally involved in producing, critiquing, improving, and disseminating results. In addition, researchers work closely with senior research leads and external collaborators and take part in the intellectual exchange about how to improve upon and disseminate the results. Through this, Researchers are expected to interact successfully with a wide range of internal and some external partners, and to describe complex concepts and materials concisely. Overall, the Researcher will be a critical member of an agile, dynamic research team.

The Resource Tracking Economic Indicators research team develops research intended to describe and assess health spending and economic activity. Previous research from this team has been published in a wide set of journals, presented around the globe, and offered online through an interactive visualization. The research produced by this team will be extended to include climate and COVID-sensitive economic indicator estimates in order to gain knowledge about changes in health spending and spending disparities across countries. The research is policy-relevant. The team's Researcher will work closely with the faculty lead, other researchers, and a team of data specialists and data analysts. This position is contingent on project funding.

**Responsibilities**

- Develop a core understanding of input data used by the team and the quantitative methods used to harmonize and combine data from a wide variety of data sources, with a focus on estimating economic indicators including gross domestic product, general government expenditure, domestic health spending, total health expenditure, poverty, and forecasting these indicators.
- Under the guidance of experienced scientist and/or faculty, carry out quantitative analyses and statistical modeling to produce results designated on a given timeline to forecast health care spending and economic activity.
- Evaluate and build upon existing code and statistical processes used to forecast health care spending and economic activity.
- Under the guidance of faculty, carry out extensive quantitative analyses and statistical modeling to produce results designated on a given timeline as part of the Economic Indicators sub-team’s projects.
- Extract data from various sources and databases. Format, transform, review, and assess data sources to determine their relevance and utility for ongoing analysis. Understand key data sources and variations in these across and within countries.
- Review, assess, and improve results and methods.
- Apply computational and statistical tools and algorithms for the preprocessing, analysis, and visualization of source data.
- Document code and analytic approaches systematically so that analyses can be replicated by other team members.
- Lead discussion in research meetings about results and analyses to vet, improve, and finalize results.
- Contribute to creation of presentations, manuscripts, and funding proposals. Co-author paper(s).
- Maintain scientific awareness and intellectual agility with data, methods, and analytic techniques.
- Other duties as assigned that fall within reasonable scope of research team.

As a UW employee, you will enjoy generous benefits and work/life programs. For a complete description of our benefits for this position, please visit our website, [click here](#).

**Requirements**

- Master’s degree in public health, epidemiology, statistics, biostatistics, math, economics, quantitative social sciences, or related discipline plus 1 year related experience, or equivalent combination of education and experience.

**Additional Requirements:**

- Proven interest and some experience using cutting-edge quantitative analyses to impact policy and improve health.
- Strong analytic, critical thinking, and quantitative skills.
- Ability to professionally and effectively communicate and work with other staff at all levels to achieve team goals for the analyses and related outputs.
- Results- and detail-oriented individual who can initiate and complete tasks under tight deadlines and changing priorities both independently and in a team environment. Flexibility with hours and workload is key.
- Demonstrated success in implementing complex analytic code in R or Python.
- Excellent communication skills, both oral and written.
- Ability to work both independently and in collaboration with a team.
- Eagerness to learn and contribute to important health economics research.
- A long-term interest in a research scientist position contributing to the overall mission of our research.

A commitment to working to alongside others at IHME to illuminate the health impacts of systemic racism and to work within IHME to make our organization more diverse and inclusive. See IHME’s DEI statement here: http://www.healthdata.org/get-involved/careers/dei.

*Equivalent education/experience will substitute for all minimum qualifications except when there are legal requirements, such as a license/certification/registration.*

**DESIRED**

- Master's degree in public health, epidemiology, statistics, biostatistics, math, economics, quantitative social sciences, or related discipline plus 4 years' related experience, or equivalent combination of education and experience.
- Track record of success working with a team, completing complex quantitative analysis, and providing written, graphical, and oral explanation of this research.
- Expertise in research using at least two statistical programming languages, R and Python.

**CONDITIONS OF EMPLOYMENT**

- Weekend and evening work sometimes required.
- Office is located in Seattle, Washington. This position is eligible to work fully remote; work schedule required to overlap 50% of IHME office hours between 8am and 6pm Pacific Time.
- This position is open to anyone authorized to work in the U.S. The UW is not able to sponsor visas for staff positions.
- The University of Washington requires students and personnel to be vaccinated against COVID-19. Under state regulations, individuals who are not fully vaccinated are required to wear masks while in all UW buildings and facilities. To learn more about the requirements, please review the following: https://www.washington.edu/coronavirus/vaccination-requirement/.

**Application Process:**

The application process for UW positions may include completion of a variety of online assessments to obtain additional information that will be used in the evaluation process. These assessments may include Workforce Authorization, Cover Letter and/or others. Any assessments that you need to complete will appear on your screen as soon as you select “Apply to this position”. Once you begin an assessment, it must be completed at that time; if you do not complete the assessment you will be prompted to do so the next time you access your “My Jobs” page. If you select to take it later, it will appear on your “My Jobs” page to take when you are ready.
Please note that your application will not be reviewed, and you will not be considered for this position until all required assessments have been completed.

Applicants considered for this position will be required to disclose if they are the subject of any substantiated findings or current investigations related to sexual misconduct at their current employment and past employment. Disclosure is required under Washington state law.

Committed to attracting and retaining a diverse staff, the University of Washington will honor your experiences, perspectives and unique identity. Together, our community strives to create and maintain working and learning environments that are inclusive, equitable and welcoming.

The University of Washington is a leader in environmental stewardship & sustainability, and committed to becoming climate neutral.

The University of Washington is an affirmative action and equal opportunity employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, gender expression, national origin, age, protected veteran or disabled status, or genetic information.

To request disability accommodation in the application process, contact the Disability Services Office at 206-543-6450 or dso@uw.edu.

Per Governor Inslee's Proclamation 21-14.1, employees of higher education and healthcare institutions must be fully vaccinated against COVID-19 no later than October 18, 2021 unless a medical or religious exemption is approved. Being fully vaccinated means that an individual is at least two weeks past their final dose of an authorized COVID-19 vaccine regimen. As a condition of employment, newly hired employees will be required to provide proof of their COVID-19 vaccination. Updated information about how to provide proof of vaccination or request a medical or religious accommodation will be posted as soon as it is known.
