Position Summary

POSITION TITLE: Bioinformatics Analyst I in the Division of Biostatistics

Purpose

Under general supervision, assists in the development, maintenance and testing of genomic data applications which focus on the use of sequencing technologies to uncover the etiology of rare disease.

Primary Functions

• With some oversight, perform high-quality analysis of large scale, high-throughput sequence data in combination with other genomics datasets to identify mutations, genes, and epigenetic marks associated with the phenotype under study.
• Assist in interpretation of analyzed data including the application of cutting-edge analysis methodologies and visualizations.
• Prepare analyzed data in a suitable format for dissemination; serve as intermediary between programmers and clinical/research professionals.
• Work with development teams to implement new methodology and tools for analysis, and/or to define improvements for existing systems and tools.
• Contribute to publications.
