The Biostatistics Service, a group of 45 doctoral and MS-level biostatisticians, is seeking highly motivated and successful doctoral-level individuals to join them as a Principal Biostatistician.

You will:

- Participate in collaborative research between the Biostatistics Service and one or more of the clinical, translational, or basic science groups in the institution.
- Support clinical collaborators in the design of studies, analysis of data, and interpretation and communication of results.
- Act as either the lead statistician for a project or, depending on the nature of the project, collaborate with a team of biostatisticians.

You have:

- A doctoral degree in statistics, biostatistics, or a related field.
- Proficiency in a statistical programming language (such as SAS, Stata, or R).
- Experience with collaborative research (including creating and maintaining data files, analyzing data, interpreting results, and manuscript writing).
- Excellent verbal and written communication skills.
- A strong commitment to statistical collaborations with medical and basic science investigators.
- The ability to manage multiple projects, collaborations, and deadlines.

The department offers exciting opportunities for growth and development at all levels. The position is located in the heart of Manhattan, a vibrant, multi-cultural city that is home to world-class restaurants, museums, and theater. MSKCC offers comprehensive benefits for individuals and family members. Applicants with any level of experience are invited to apply.

MSKCC is an equal opportunity and affirmative action employer committed to diversity and inclusion in all aspects of recruiting and employment. All qualified individuals are encouraged to apply and will receive consideration without regard to race, color, gender, gender identity or expression, sexual orientation, national origin, age, religion, creed, disability, veteran status or any other factor which cannot lawfully be used as a basis for an employment decision.
