Assistant Professor
Statistics

Xavier University is part of the 500-year-old Jesuit Catholic tradition of academic excellence in the liberal arts and is strongly committed to enhancing equity, inclusion, and diversity. These values are central to our mission. We strive for a climate of respect and inclusiveness that welcomes and supports members from diverse backgrounds and life experiences, is committed unreservedly to open and free inquiry, and deliberately seeks out multiple perspectives.

The faculty in the Department of Mathematics invite applications for a tenure-track Assistant Professor in Statistics, starting in Fall 2023. Applicants must have a Ph.D. in Statistics (or a related field such as Biostatistics, Data Science, or Actuarial Science) by August 2023.

Our department seeks to build a community that champions the mathematician in everyone. We are home to four undergraduate degree programs and offer minors in mathematics, statistics, and applied mathematics. We also collaborate in a new interdisciplinary honors program in data science. Class sizes are kept small to promote close faculty-student interaction for discussion, exploration and thought. A successful candidate will be expected to utilize innovative and effective approaches in the teaching of statistics to both majors and non-majors alike.

We seek colleagues committed to active scholarship in a liberal arts tradition. Because most of our majors conduct undergraduate research, candidates who have enthusiasm for advancing the culture of inquiry within our student body are encouraged to apply. Tenure-track faculty teach three courses each semester, maintain a productive research agenda, and engage in service that is consistent with our purpose to educate students whose lives will be lived for others. Xavier has a strong commitment to diversity and seeks a broad spectrum of candidates who are equally committed to fostering and engaging with a diversity of ideas and experiences and to creating an inclusive environment in the classroom and university setting.

Xavier’s urban location in Cincinnati allows faculty to work with community partners to develop engaged learning and internship opportunities. Xavier is a member of the Association of Jesuit Colleges and Universities as well as the Big East.

A complete application includes:

- cover letter;
- curriculum vitae;
- statement of teaching experience and philosophy;
- statement of research achievements and goals;
- statement of experience and vision for equity, inclusion, and diversity;
- graduate transcripts;
- three letters of recommendation
These items should be submitted online at: [http://www.mathjobs.org](http://www.mathjobs.org). To ensure full consideration, all application materials must be received by October 24, 2022.

Xavier University is an Equal Opportunity employer committed to enhancing equity, inclusion, and diversity. All qualified applicants will receive consideration for employment without discrimination on the basis of race, skin color, ethnicity, religion, sex, sexual orientation, gender identity or expression, national origin, age, marital status, veteran status, or disability.

Questions about the position may be directed to Max Buot, Chair, Department of Mathematics, buotm@xavier.edu. For more information about our department, please visit [http://www.xavier.edu/mathematics](http://www.xavier.edu/mathematics).
