Final date: Friday, Jan 13, 2023 at 11:59pm (Pacific Time)
Applications will continue to be accepted until this date, but those received after the review date will only be considered if the position has not yet been filled.

POSITION DESCRIPTION

Applications are invited for an open rank In-Residence faculty position in the Department of Biostatistics in the UCLA Jonathan and Karin Fielding School of Public Health (http://www.biostat.ucla.edu). Titles in the In-Residence series confer membership in the UCLA Academic Senate and are assigned to individuals who engage in research and teaching to the same extent as those holding corresponding titles in the Regular Professor series at UCLA. Accordingly, we seek an excellent candidate with a strong track record or evidence of outstanding potential for methodological and collaborative research, obtaining external funding, teaching, and contributing to our commitment to diversity and excellence. Important aspects of this position include collaboration with Veteran Health Administration and Department of Energy; and contribute through teaching and ongoing program development to the new Master of Data Science in Health graduate professional degree program housed within the Fielding School of Public Health. Background and experience in interdisciplinary research involving biobanks, electronic health records, mobile health (mHealth), omics, personalized medicine, cardiometabolic diseases, military veterans and members of their families would be highly desirable and could translate to opportunities for collaboration on numerous funded projects.

The Fielding School of Public Health is located on the main UCLA campus in direct proximity to the other health sciences schools (Medicine, Dentistry, and Nursing), several professional schools, and the College of Letters and Science. The UCLA Department of Biostatistics has a strong history of and commitment to interdisciplinary research and collaboration.

Candidates should hold a PhD or equivalent in Statistics, Biostatistics or a related quantitative field, and demonstrate potential for or evidence of scholarly impact through publications, excellence in teaching, and ability to obtain external funding, consistent with career stage. Faculty appointment level and salary will be commensurate with the candidate’s experience and qualifications.

All qualified applicants are encouraged to apply online. Applicants should submit a cover letter, curriculum vitae, three letters of references, a statement of research interests including a summary of previous research work and its significance, a teaching statement and a diversity statement addressing past and or potential contributions to diversity through research, teaching and/or service. Individuals with a history of and a commitment to mentoring students underrepresented and under-served in the sciences, and who demonstrate an interest in campus-wide or departmental programs that provide research and professional development opportunities for a diverse student body are encouraged to apply. Please describe such commitments within your Statement of Contributions to Diversity.

QUALIFICATIONS

Basic qualifications (required at time of application)
Candidates should hold a PhD or equivalent in Statistics, Biostatistics or a related quantitative field.

APPLICATION REQUIREMENTS

Document requirements
- Curriculum Vitae - Your most recently updated C.V.

CAMPUS INFORMATION

As a condition of employment, you will be required to comply with the University of California SARS-CoV-2 (COVID-19) Vaccination Program Policy. All Covered Individuals under the policy must provide proof of Full Vaccination or, if applicable, submit a request for Exception (based on Medical Exemption, Disability, and/or Religious Objection) or Deferral (based on pregnancy) no later than the applicable deadline. New University of California employees must (a) provide proof of receiving at least one dose of a COVID-19 Vaccine no later than 14 calendar days after their first date of employment and provide proof of Full Vaccination no later than eight weeks after their first date of employment; or (b) if applicable, submit a request for Exception or Deferral no later than 14 calendar days after their first date of employment. (Capitalized terms in this paragraph are defined in the policy.) Federal, state, or local public health directives may impose additional requirements.

The University of California is an Equal Opportunity/Affirmative Action Employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, disability, age or protected veteran status. For the complete University of California nondiscrimination and affirmative action policy, see: UC Nondiscrimination & Affirmative Action Policy.
