Part-Time Instructor Position at Art of Problem Solving Academy, Bellevue

The Art of Problem Solving Academy in Bellevue provides a strong mathematics and language arts enrichment program for primary and secondary level students. We are currently growing our math and language arts programs and are looking for part-time instructors who hold at least a bachelor's degree.

We believe that our academy provides an ideal environment for both new and veteran instructors. We offer in-person classes after-school, during the evenings, and throughout the weekend. The students who apply to our program are motivated, eager learners who are up for a challenge. Since class plans are pre-made, no lesson planning is required beyond preparation of the content. There is no grading of homework, only exams at the end of each academic term, for which there is additional compensation. We also provide a support network for new instructors looking to develop their pedagogy in our halls and our veteran instructors appreciate the unique teaching experiences they have with our brilliant learners.
