### Title
Onnela Lab Postdoctoral Research Fellow Position Network Science

### School
Harvard T.H. Chan School of Public Health

### Department/Area
Biostatistics

The Onnela Lab in the Department of Biostatistics at the Harvard T.H. Chan School of Public Health is seeking candidates with a Ph.D. in biostatistics, applied mathematics, statistical physics, computer science, or a related quantitative field for a two-year Postdoctoral Research Fellow position. This position, which is in the field of network science, involves developing new network community detection methods for administrative health data. Some of the goals of the project involve leveraging nodal covariates (attributes) as part of the community detection procedure and extending the applicability of these methods to longitudinal data. Understanding uncertainty in the detected community structure is also of interest in this project.

### Position Description
Doctoral degree in biostatistics, computer science, applied mathematics, or a related quantitative field. Excellent programming skills, as well as strong oral communication and writing skills are required.

### Basic Qualifications
For more information about the lab, please visit [https://www.hsph.harvard.edu/onnela-lab/](https://www.hsph.harvard.edu/onnela-lab/)
