Postdoctoral fellow in Statistics  
University of Haifa, Israel

The Department of Statistics at the University of Haifa in Israel has an immediate opening for a **postdoctoral fellow** to be supervised by Prof. Philip Reiss. The fellow will participate in developing novel methods for analysis of complex data in psychology and environmental science, with emphasis on semiparametric and functional data approaches.

The postdoctoral position is for one year, with a possibility of renewal. Applicants should hold, or be very close to completing, a PhD in statistics or biostatistics. Facility with R programming and strong communication skills are required.

For candidates from other countries, working remotely for a portion of the postdoc period may be a possibility.

To apply, please send a cover letter describing your research interests, your CV, and contact information for three references to Prof. Reiss at reiss@stat.haifa.ac.il.

The position will be open until filled.
